INTRODUCTION

India International LED Lighting and Electrical Expo – L & E Expo India 2016 comes to New Delhi in 2016 presenting the biggest news of the global market of LED technology and Electrical materials.

L & E Expo India brings exhibitors from different countries presenting new technologies and industry trends in a business platform, promoting their brands through interaction and demonstration of the best products for a potential visitor audience of traders, importers, LED industry entrepreneurs, engineers, builders, and architects among others.

L & E EXPO INDIA 2016

For all its dimension and economic growth potential, India is a target market in the world, with a population of nearly 1.3 billion people, and one of the fastest growing economies in the world. For all that, IFFARE chose India to host the event in a calendar which also includes Brazil and Iran in 2016.

Considering the importance of sustainable energy consumption in a global perspective, the LED technology is expanding worldwide, replacing the fluorescent and incandescent models by clearly more efficient and durable

models. This trend opens up space for trade shows that strengthen the sector through the exchange of innovation between stakeholders from around the world.

The L & E Expo India 2016 will bring together technology companies in LED products and electrical destined to approach them one of the world's great consumer markets.
